Prof. Dr. Halit Pinar, Prof. Dr. Osman Karaoglan and Assoc. Prof. Dr. Hasan Tatari have been working at the Division of Knee Surgery, Sports Traumatology and Arthroscopy.

The department does not itself organize courses, but beginning this year, the Board of the Turkish Society of Sports Traumatology, Arthroscopy and Knee Surgery has decided that the Izmir branch will organize arthroscopy courses every year. Our department will take part in live demonstrations from the operating theater.

Our division performs 6 to 10 knee arthroscopies per week. Most arthroscopies have been performed on non-sports populations. We also perform ankle arthroscopies, mostly soft tissue and osseous impingement lesions. We perform fewer ankle arthroscopies than knee arthroscopies, perhaps 30 to 40 every year.
