Teaching Centre

In the true sense of the word, the centre is not a teaching centre. It consists of a sole private practice, basically only treating knee problems. The Centre is, however, affiliated with both the Universities of Stellenbosch and Cape Town. A registrar of the University of Stellenbosch rotates through the centre every Thursday to observe surgical techniques.

Organisation of the Centre

The centre forms part of the Stellenbosch Musculo-Skeletal and Sport Forum. This Forum is a loosely associated practice consisting of a biokineticist, physiotherapists, sports physicians and other disciplines involved in musculo-skeletal rehabilitation and sports injuries.

The centre is located in Stellenbosch, a University town in the Western Cape in South Africa. It is a private practice specialising in knee surgery. All types of knee pathology are seen and treated, from small arthroscopic procedures to revision knee replacements.

Theatre lists are run half days, in two theatres, on Monday, Tuesday, Thursday and Friday. The other time is used for consultation. Clinical meetings are run once monthly at night.
