

Overview of Rotator Cuff Repair

Eiji Itoi, MD, PhD

Department of Orthopaedic Surgery
Tohoku University School of Medicine
Sendai, Japan

Ideal construct of rotator cuff repair(1)

- 1) strong initial strength
- 2) minimum gap formation
- 3) no tissue strangulation

Transition of rotator cuff repair technique

- 1) single row(2, 3)
- 2) double row(4-6)
- 3) transosseous equivalent (TOE)(7-9)
- 4) triple row(10, 11)
